

How much does a photovoltaic panel cost per megawatt of electricity

Overview

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does it cost to install and manage solar panels?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. 1,2,12 This figure includes the solar panels, the installation, and other expenses.

How efficient are solar panels?

The average solar panel is around 21% efficient, according to the Center for Sustainable Systems (CSS). However, most residential solar panels range from 18% to 22%. Commercial and utility solar panels can have much higher efficiencies, as much as 24%, while some lower-quality solar panels may have slightly lower efficiencies of around 17%.

How much does a solar system save on energy costs?

On average, homeowners with a complete solar system save \$41,000 to \$62,000 on total avoided energy costs over 25 years. It all depends on what your local utility charges for electricity, according to Robert Flores, a solar expert at The University of California, Irvine's Clean Energy Institute.

How much does solar power cost in 2025?

Take control of your energy costs with solar power. Solar panels generate

“free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you’re able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

How much does a photovoltaic panel cost per megawatt of electricity

[How Much Do Solar Panels Cost? \(Aug 2025\)](#)

How much does it cost to get solar panels in different states? The price of solar panels changes depending on where you live, but the average for installation is just under ...
