Overview

Where can I find electricity prices in Europe?

All prices excluding vat and taxes. Spotprices.eu let's you compare current and historical electricity prices in Europe. Prices are collected from ENTSO-E, and exchange rates from freecurrencyapi.com (where applicable).

What determines the price of electricity in Europe?

Supply and demand determine the price of electricity in Europe. If there is a high production of electricity from power plants and demand is low, the price will fall. If, on the other hand, the production of electricity is small and demand is high, prices will increase.

How many external power supplies are there in the EU?

In 2020, 1.7 billion external power supplies (EPS) were in use in the EU27, of which 75% for residential use, on average 6.5 units per EU household. They converted 48 TWh/a of electricity from the 220V mains to the input needed by the powered products.

How much does electricity cost in Europe 2025?

On July 19, 2025, electricity prices across Europe show a varied landscape.

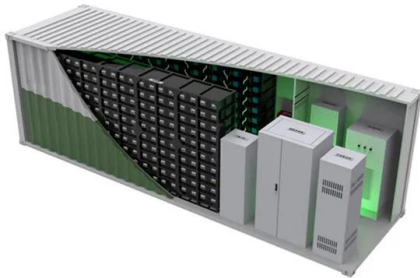

Italy registers the highest average price at 0.12 €/kWh consistently across all its regions. In contrast, the lowest prices are found in Norway's NO4 and NO5 regions, where electricity is effectively free at 0.00 €/kWh.

What are wholesale electricity prices?

Wholesale electricity prices are average day-ahead spot prices per MWh sold per time period, sourced from ENTSO-E, Low Carbon Contracts and semopx. Prices have been converted from £/MWh to €/MWh for the UK. These are the prices paid to electricity generators, and are not the same as retail electricity prices or total costs to end users.
