

How much does the battery cabinet cost

Overview

Let's cut to the chase: battery energy storage cabinet costs in 2025 range from \$25,000 to \$200,000+ – but why the massive spread?

Whether you're powering a factory or stabilizing a solar farm, understanding these costs is like knowing the secret recipe to your grandma's famous pie. How many batteries can a battery cabinet hold?

Like the previous generation, the battery cabinet can hold between 3 and 6 battery modules, equaling 9 to 18 kWh of energy storage capacity. Up to two battery cabinets can be connected to a single inverter, and two inverters can be used, for a total of 72 kWh of storage in a single installation.

How much does a pwrcell battery cost?

Larger systems require an additional cabinet, more battery modules, and a larger inverter. The PWRcell outdoor-rated cabinet costs \$3,000 to \$4,000. Each cabinet can hold three to six battery modules for a total capacity of 9 kWh to 18 kWh. Additional 3 kWh battery modules cost \$1,900 to \$2,500 each.

How much does a pwrcell battery backup cost?

Another PWRcell cabinet with an additional 18 kWh of storage can be added to the system for about \$15,000. These costs would be in addition to a solar installation, so the total cost for a typical 18 kilowatt-hour (kWh) Generac PWRcell battery backup with a 6-kW solar installation would be around \$43,000.

How many battery cabinets can be connected to a single inverter?

Up to two battery cabinets can be connected to a single inverter, and two inverters can be used, for a total of 72 kWh of storage in a single installation. The new PWRcell 2 Inverter switches the DC power from the battery to AC power for your home.

How much does a solar battery cost?

A solar battery costs \$8,000 to \$16,000 on average installed, depending on the size and brand. Popular batteries from LG Chem and Enphase typically cost less than the Generac PWRcell. However, the PWRcell has a high round-trip efficiency compared to many other models. *Not including installation.

How does Generac identify a pwrcell Battery Cabinet?

Generac identifies the PWRcell battery cabinet with the letter M and a number based on the number of battery modules inside. For example, M3 has three battery modules, M4 has four, and so on up to M6. Here are the important specs of the PWRcell system based on battery capacity: Max. Continuous Power (kW)
