

How much is the demand for energy storage power in the Democratic Republic of Congo

Overview

Despite millions of dollars of donor funding, according to the World Bank only 19 percent of the DRC's 108 million people have access to electricity – about 41 percent in urban areas and 1 percent in rural are.

What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available [here](#). The Democratic Republic of Congo's national electricity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million house-holds, only 1.6 million have have access to electricity.

How can we better understand electricity demand in the DRC?

To better understand present and future electricity demand in the DRC, a concerted effort by public agencies and donors, under the leadership of the Ministry of Energy and Hydraulic Resources to collect better data will be needed, as will a flexible approach to quickly factor evolving demand growth.

What is the government's vision for power generation in Congo?

The government's vision is to increase the service level to 32 percent by 2030. Lack of access to modern electricity services impairs the health, education, and income-generating potential of millions of Congolese people. Most power generation development is directed and funded by mining companies seeking to power their facilities.

How much power does DRC have?

The DRC's total hydropower capacity is about 100,000 MW, with the Inga dam solely counting for 40,000-45,000 MW . A decade ago, during the year 2009, 89% of DRC's total population did not have access to electricity, leaving only 11% with access, while 94% of the population were completely dependent on biomass as the main cooking fuel .

How much would it cost to get grid electricity in DRC?

Providing all households of the 26 provincial capitals of DRC access to grid electricity through a mix of mid-sized hydro and solar power plants would cost approximately USD 10.5 billion in CAPEX. This would raise the access rate to about a third of the population, at a cost equivalent to 30% of GDP.

How does the DRC generate energy?

Therefore, the DRC exports all of its oil production capacity, and imports all the refined products such as gasoline, jet fuel, kerosene, aviation gas, fuel oil and liquefied petroleum gas (LPG) . Even though the DRC possesses prosperous and varied resources for energy generation, the energy sector still falls far behind.
