

How to adjust the voltage and current of the battery cabinet

Overview

Can a battery cabinet be connected to a DC Circuit?

The battery cabinet frame is not referenced to the DC circuit. Each battery cabinet has its own overcurrent protection device. Internal battery strings are to be connected by an authorized Eaton Customer Service Engineer. 1.7 For More Information for UPS cabinet conduit and terminal specifications and locations.

Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet as viewed from the front of the cabinet. See Figure 3 for line-up-and-match configuration views. Figure 3. Eaton 93PM 100 kW UPS and Two 93PM Integrated Battery Cabinets.

What temperature is a battery cabinet rated for?

The battery cabinet is rated for operation in up to a 40°C (104°F) ambient temperature. NOTE Emergency lighting and power equipment battery cabinets (UL924) are rated for operation in a 20°-30°C (68°-86°F) temperature environment. The batteries are rated for a 25°C (77°F) ambient temperature to extend their useful life.

Are battery cabinets 5 & 8 Wired the same?

Battery cabinets 5 through 8 are wired the same. The components inside the IBC are secured to a sturdy metal frame. All repairable parts and assemblies are located for easy removal, with very little disassembly. This design allows authorized service personnel to perform routine maintenance and servicing quickly.

How many cabinets can be paralleled with a 93pm 100-400 kW UPS?

Up to four cabinets can be paralleled with a 93PM 100-400 kW UPS. Figure 38

shows the UPS and 93PM IBC-L or 93PM IBC-LH intercabinet interface connection onelines. Battery Detect and DC Shunt Trip wiring should be a minimum of 18 AWG. Four battery cabinets shown. Battery cabinets 5 through 8 are wired the same.

Where is the battery cabinet located?

The battery cabinet may be located to either the right or left of the UPS cabinet. The recommended location is to the right of the UPS cabinet. This procedure assumes the battery cabinet is located to the right of the UPS cabinet. 21.
