

SYSTEM SERIES DIAGRAM

The diagram illustrates the system architecture and component interconnections:

- AC Supply:** Includes a Grid or Generator, a No Load Switch, and Loads.
- CANbus Type B Cable:** Connects the Color Control-ER unit to the CANbus Terminator.
- CANbus Terminator:** Terminates the CANbus line.
- Ethernet:** Connects the CANbus Terminator to the Internet.
- PV Array:** Solar panels connected to the MPPT.
- MPPT:** Maximum Power Point Tracking unit that converts solar energy to DC.
- AC Distribution:** Receives power from the AC Supply and distributes it to various loads.
- DC Distribution:** Receives power from the MPPT and distributes it to the battery modules.
- 48V Pyrotech Battery Modules:** Two modules providing DC power storage.
- Color Control-ER:** A central control unit that manages the system's power and data flow.
- VILoad:** A load connected to the system's power distribution.

Huawei Brunei photovoltaic panel factory

Brunei Photovoltaic Panel Manufacturer Powering Sustainable ...

Summary: Discover how Brunei's photovoltaic panel manufacturers are shaping the renewable energy landscape. Explore market trends, technological advancements, and strategic ...
