

# **Huawei Energy Storage Cabinet Battery Calibration**

## Overview

---

How many lithium battery cabinets can be connected in parallel?

A maximum of 15 SmartLi 2.0 lithium battery cabinets can be connected in parallel. When multiple cabinets are connected in parallel, only the master cabinet has an LCD. Easy capacity expansion: Batteries can be added along with load increase by stages. New and old battery cabinets can be connected in parallel.

Can a battery cabinet be deployed outside a smart module?

Battery cabinets or racks can also be deployed outside smart module A (batteries deployed outside) or smart module B. The front door is a single door, and the rear door is a double one. Shoto batteries are supported.

Does Huawei guarantee the security of preconfigured certificates?

Huawei does not promise or guarantee the security of preconfigured certificates. The customer shall bear consequences of all security risks and security incidents arising from using preconfigured Huawei-issued certificates as service certificates. A preconfigured Huawei-issued certificate is valid from the manufacturing date until December, 2099.

What temperature should a battery be stored at?

Ambient temperature:  $-40^{\circ}\text{C}$  to  $+60^{\circ}\text{C}$  ( $0^{\circ}\text{C}$  to  $40^{\circ}\text{C}$  are recommended. If batteries are stored at a temperature higher than  $40^{\circ}\text{C}$  for extended periods, the battery performance and service life may be deteriorated.) The batteries in storage must be disconnected from external devices. The indicators (if any) on the batteries must be of.
