## Overview

---

How much power does Sierra Leone have?

Sierra Leone's power capacity estimates at 150-MW with approximately 27.5% of the total population and about 4.9% of the rural population currently having access to electricity.

What is the western area power generation project?

The Western Area Power Generation Project, located in Sierra Leone's capital of Freetown, aims to help address the country's rolling blackouts and expand its national electricity system to accommodate additional renewable energy solutions in the future.

How much money will DFC invest in Sierra Leone's power project?

DFC's financing also includes approximately \$120 million in political risk insurance to bring in private investment to the project, which would be the first utility-scale, independent power project in Sierra Leone.
