

The diagram illustrates a Smart Grid & Home system. At the top, a sun icon is labeled "PV Module". Below it, a house is shown with a cutaway view of its interior. The house has three floors: a top floor with a living area, a middle floor with a bedroom, and a bottom floor with a living area and stairs. The energy flow is indicated by blue arrows: from the PV Module to an "AC distribution" unit, then to an "Energy meter", and finally to "Home load" (represented by a box containing a refrigerator and a washing machine). A bidirectional arrow connects the "Energy meter" to the "Grid" (represented by a power line tower). A large battery unit labeled "AI-W5.1-B-ESS" is connected to the "AC distribution" unit and the "Energy meter".

Huawei Venezuela container energy storage

[Huawei launches solar PV and energy storage solutions](#)

Huawei's new solar PV and energy storage solutions will meet global demand for low-carbon smart solutions underpinned by clean energy. Huawei has launched its new smart ...
