

Huawei base station power cabinet

Overview

How much power does a Huawei base station use?

APM30+ RFC +TMC+BB,DRFU (S444)/ GRFU (S121212): 4-hour standby (184Ah) Description: The power consumption of the transmission cabinet is less than 200W. Huawei's fourth-generation base station includes: indoor macro base station BTS3900, outdoor macro base station BTS3900A, distributed base station DBS3900.

How many RF modules are in a base station cabinet?

The base station cabinet contains as many as six RF modules. These multicarrier modules support both Huawei's GSM-R 5.0 and the company's enterprise LTE (eLTE). Use of this multi-radio base station (and similar indoor base stations) maximizes versatility while minimizing site deployment costs.

What is a bts3900a RF Cabinet?

A BTS3900A or BTS3900A (Ver.C) cabinet consists of an RF cabinet and a power cabinet, or of an RF cabinet and a transmission cabinet. The RF cabinet is installed outdoors and uses a direct ventilation system. The power cabinet or transmission cabinet can be stacked on top of the RF cabinet.

What is the difference between RF Cabinet and power cabinet?

The RF cabinet is installed outdoors and uses a direct ventilation system. The power cabinet or transmission cabinet can be stacked on top of the RF cabinet. Together with the RF cabinet, the power cabinet or transmission cabinet provides the power distribution and surge protection functions for the BBU3900 and RFUs.

What is the operation and maintenance of a gu co-Cabinet base station?

Solution Guide 8 Operation and Maintenance Operation and Maintenance About This Chapter The operation and maintenance of the 3900 series GU co-cabinet base stations mainly involve alarm management, inventory

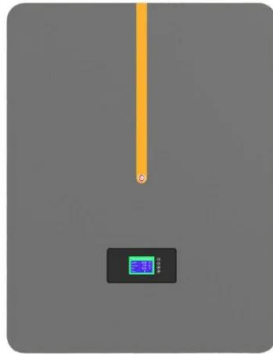

management, routine maintenance, emergency maintenance, and software upgrade.

How does a bbu3900 work?

A BBU3900 is equipped with different boards, among which some work in one mode and the others work in another mode. The BBU3900 can process services for both of these modes. With two BBUs, the triple-mode application can be achieved. Developed with the Software-defined radio (SDR) technique, RF modules can work in GU or GL dual-mode.
