

Huawei s large-scale independent energy storage project

Overview

The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4.5GWh battery storage system. The project has commenced in November 2024. Who is responsible for Huawei energy storage system?

Among them, the ACWA Power will be responsible for the developer's part while Shandong Power will provide the EPC (Engineering, Procurement, and Construction) supplies. In July 2021, Huawei filed an energy storage system patent that was publicly shared on July 9th in China.

Is Huawei preparing for energy storage in 2021?

In July 2021, Huawei filed an energy storage system patent that was publicly shared on July 9th in China. This patent targets to normalize the hardware architecture and provides convenient maintenance with reduces costs. We can see the company has a long time preparation for the energy storage which is now gradually starting to implement in actual.

What is Huawei digital power?

Huawei Digital Power is dedicated to enhancing the safety and stability of renewable integration by combining digital and power electronics technologies, leveraging technical experience, and collaborating with global power companies, grid enterprises, and electricity providers.

What is Huawei smart string ESS?

It is powered by a 50 MW/100 MWh Huawei grid-forming Smart String ESS solution, which has been verified through performance tests to have excellent grid-forming capabilities, compatibility with various types of power supplies, and parallel operation capabilities of multiple devices.

A large, white ESS Energy Storage System cabinet with its door open, showing internal components. The door is open to the left, revealing a complex internal structure with various electrical components and wiring. The cabinet has a green vertical stripe on the left side of the door. The ESS logo and "Energy Storage System" text are visible on the front panel. A yellow warning triangle is located on the bottom right of the door.

The Red Sea Project in Saudi Arabia, the world's largest microgrid energy storage project, is a notable example of Huawei's Grid-Forming Solution. It achieves 100% PV+ESS supply and ...
