

# **Huawei s latest energy storage battery system project**

## Overview

---

Will Huawei build the world's largest solar farm?

REUTERS/Aly Song/File Photo SP New Energy Corp.'s (SPNEC) efforts to build the world's largest solar farm are on full blast with Chinese tech giant Huawei ensuring the P200-billion Terra Solar project is equipped with the "latest" technology in energy storage system.

What makes Huawei a great energy storage company?

Huawei has more than 10 years of experience developing and researching energy storage systems, and this has been applied throughout a global installed base of more than 8 GWh.

How does Huawei manage lithium batteries?

Simplified O&M: Huawei uses power electronic technologies to overcome the inconsistencies inherent to lithium batteries, and implements refined management to maximize the battery charge and discharge capacity, while also supporting mixed use of old and new batteries and facilitating maintenance and replacement.

Does Huawei's mterra Solar Project deliver green electricity?

That project, which spans 100 kilometers of grid infrastructure and operates entirely on solar and battery storage, delivered over 1 terawatt-hour of green electricity in its first year. Huawei's contribution to the MTerra Solar project includes the full 4,500 megawatt-hours capacity of its battery energy storage system.

Is Huawei partnering with sepcoiii for a 1300 MWh off-grid battery energy storage system?

Huawei has recently signed the contract with SEPCOIII at Global Digital Power Summit 2021 in Dubai for a 1300 MWh off-grid battery energy storage system (BESS) project in Saudi Arabia, currently the world's largest of its kind.

What is Huawei's largest energy supply agreement?

The BESS supply agreement marks Huawei's largest to date. Construction started on the Meralco Terra Solar solar-plus-storage project in November 2024. The site is claimed to be the world's largest integrated power plant that combines the two technologies.
