

# **Hungary has solar power generation for home use**

## Overview

---

Solar power in Hungary has been rapidly advancing due to government support and declining system prices. By the end of 2023 Hungary had just over 5.8 GW of photovoltaics capacity, a massive increase from a decade prior. Solar power accounted for 24.8% of the country's electricity generation in.

• • • • • .

• (in Hungarian) • • •

Hungary has climbed to the top of Europe's solar energy ranking, surpassing Greece, as solar systems accounted for a remarkable 25 per cent of domestic electricity generation in 2024, according to a report shared by the Ministry of Energy (EM) on Thursday.
