

# **Iceland photovoltaic power station inverter**

## Overview

---

Which hydroelectric power stations are in Iceland?

The hydroelectric power stations, historically all run by Landsvirkjun, are central to the existence of Iceland as an industrialized country. The largest power station by far is Kárahnjúkar Hydropower Plant (690 MW), which generates electricity in the area north of Vatnajökull for the production of aluminum.

How is electricity generated in Iceland?

Nearly all of Iceland's electricity (>99%) is generated from renewables (mainly hydroelectric dams and geothermal). The islands of Grimsey and Flatey rely on diesel as they are not connected to the grid. Over 80% of electricity in Iceland is generated in hydroelectric power stations.

What is the largest power plant in Iceland?

The largest power station by far is Kárahnjúkar Hydropower Plant (690 MW), which generates electricity in the area north of Vatnajökull for the production of aluminum. Iceland uses geothermal energy for heating as well as electricity generation.
