

Indonesia Base Station Power Supply Plant

Overview

How many power stations are there in Indonesia?

There are over 50 power stations listed across the islands of Sumatra, Java, Bali, Sulawesi and others. The largest existing power stations are coal-fired facilities including Suralaya at 3,400MW and Paiton at 3,410MW. New coal, gas and geothermal power stations are also planned to help meet Indonesia's future energy needs.

What is the largest source of power in Indonesia?

Thermal power is the largest source of power in Indonesia. There are different types of thermal power plants based on the fuel used to generate the steam such as coal, gas, diesel, etc. About 85% of electricity consumed in Indonesia is generated by thermal power plants. Note: IPP means independent power producer.

What are the major power plants in Indonesia?

Key Plants: Suralaya Power Plant (Banten): One of the largest coal-fired power plants in Indonesia, located on the island of Java. Paiton Power Plant (East Java): A major coal-fired power plant, contributing significantly to the country's electricity needs.

Where is the largest coal power plant in Indonesia?

Tanjung Jati B Power Plant (Central Java): Another significant coal power station located on Java island. Suralaya Power Plant (Banten): One of the largest coal-fired power plants in Indonesia, located on the island of Java.

Which is the largest geothermal power plant in Indonesia?

Kamojang Geothermal Power Station (West Java): One of the oldest geothermal power plants in Indonesia, contributing significantly to the country's renewable energy output. Sarulla Geothermal Power Plant (North Sumatra): The largest geothermal power plant in Indonesia and one of the

largest in the world.

How much power does Indonesia have?

According to the report, Indonesia currently has an installed power capacity of 101GW, with 75GW managed by PLN. Renewables comprise 15% of the energy mix, while coal dominates more than half. Indonesian officials indicate that 70% of the new power plants will utilise renewable energy, potentially including nuclear and hydrogen sources.
