

# **Installation location of lead-acid batteries for communication base stations**

## Overview

---

What are the standards for sizing large lead acid storage batteries?

IEEE Standard 485-1997: "Recommended Practice for Sizing Large Lead Acid Storage Batteries for Generating Stations." IEEE Standard 1187-2002: "Recommended Practice for Installation Design and Installation of Valve Regulated Lead-Acid Storage Batteries for Stationary Applications".

What are recommended design practices and procedures for vented lead-acid batteries?

Abstract: Recommended design practices and procedures for storage, location, mounting, ventilation, instrumentation, preassembly, assembly, and charging of vented lead-acid batteries are provided. Required safety practices are also included. These recommended practices are applicable to all stationary applications.

Where should batteries be installed?

For large batteries, it is required that you begin installation in the center of the rack. When using tier racks, install the batteries on the bottom rack first. Attention! When handling the batteries, observe the instructions in Chap. 5.7.

What is the recommended operating temperature for lead-acid batteries?

The recommended operating temperature for lead-acid batteries is between 10 °C and 30 °C. Technical data is valid for the nominal temperature of 20 °C. The ideal operating temperature range is 20 °C ± 5 K. Higher temperatures shorten the service life of the battery. Lower temperatures decrease battery capacity.

Where can I find the identification plate of the battery system?

Refer to the example below. 10). The identification plate of the entire battery system can be found on the battery rack or inside the battery cabinet. 10 = CN) and the battery type are the system.

Who is responsible for displaying the Ce label on a battery system?

The installer of the battery system is responsible for displaying the declaration and affixing the CE label on or next to the battery's identification plate. Used batteries with this marking are recyclable goods and must be sent for recycling. Attention!
