

# Installation of solar integrated energy storage cabinet

## Overview

---

What is a fully integrated energy storage system?

This fully integrated energy storage system features a comprehensive all-in-one design, incorporating essential switches for battery fuses, photovoltaic input, utility grid, load output, and diesel generators.

What is a compact energy storage system?

The compact design integrates the battery and inverter into a single unit, saving valuable space while simplifying installation and operation. This fully integrated energy storage system offers an all-in-one design that simplifies installation and operation, making it a plug-and-play solution for residential energy needs.

How does a solar energy storage system work?

This advanced energy storage system features dual active-cooling fans that automatically activate when the internal temperature reaches 30°C. The intelligent cooling mechanism ensures optimal thermal management, protecting the batteries and inverter while significantly extending their lifespan.

What is power key smart liquid cooling integrated cabinet?

Power Key Smart Liquid Cooling Integrated Cabinet designed with highly integrated technology, with high flexibility in installation and application. You are looking for relevant information about this solution. Find a service point in your area to quickly solve your problem.

## Product Information

### Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 1000V
- 100% Peak Output Power
- 2 MPPT Trackers, 100% DC Input Utilization
- Max. PV Input Current 10A, Compatible with High-Power Modules

### Intelligent Simple O&M

- IP65 Protection Degree: support outdoor installation
- Smart 1-19 Curve Diagnosis Function: locate Pri-ming faults accurately and automatically detect faults
- DC & AC Type I SPD: prevent lightning damage
- Battery Reverse Connection Protection

### Flexible Abundant Configuration

- Plug & Play, LPT Switching under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units In-series Parallel
- AGC Function (Optional): when an arc fault is detected the inverter immediately stops operation
