

# **Iraq container photovoltaic base station**

## Overview

---

Does Iraq have a solar power plant?

The contracts also cover a water intake project for injection into oil reservoirs. The solar power plant will be Iraq's first utility-scale solar power project. While the country has several other solar plans in the pipeline, the TotalEnergies project is the first to proceed to the implementation phase.

Will totalenergies build a solar power plant in Iraq?

French energy major TotalEnergies will build a 1-gigawatt solar power plant in Iraq as part of a cluster of contracts it was awarded in 2021 for an integrated project that entails a total investment of \$27 billion over 30 years.

How much electricity does Iraq need?

To make up the shortfall, Iraqis have had to resort to private generators that are expensive and cause pollution. According to the specialist publication Iraq Oil Report, citing a senior Electricity Ministry official, the current electricity demand in Iraq is 15 gigawatts, outstripping the supply of 14 gigawatts.

Why does Iraq have a poor electricity supply?

Iraq's inadequate electricity supply has been a drag on economic growth and a source of social instability. The problem is getting worse as the electricity supply is unable to meet rising demand due to rapid population growth. To make up the shortfall, Iraqis have had to resort to private generators that are expensive and cause pollution.

How much gas does Iraq produce a day?

Iraq produces around 3 billion cubic feet of natural gas per day, nearly all of which falls under oil production. Because of insufficient infrastructure, almost half of the gas burns into the atmosphere, leading to gas shortages and emitting an estimated 36 million tons of CO2 annually.
