

Ireland Customized Mobile Energy Storage Power Supply

Overview

Who sells AEG battery to grid systems in Ireland?

DE Power Solutions is the exclusive distributor of AEG battery to grid systems throughout Ireland. BESS systems are a high performing and sustainable solution to your back-up power requirements. Flexible on-grid and off-grid solutions AEG Power Solutions designs the core power electronics components of any battery energy storage.

What is energy storage Ireland (ESI)?

Energy Storage Ireland (ESI) is an industry representative association comprised of members who are active in the development of energy storage in Ireland and Northern Ireland.

Is battery storage enough to meet Ireland's short-term reserve requirements?

The battery storage deployed today is enough to meet Ireland's short-term reserve requirements, but we are going to need a lot more energy storage from a variety of technologies with different capabilities by 2030. This will be essential to manage the large volumes of renewable generation necessary to meet our climate action targets.

What is a battery energy storage solution?

Solutions range from single unit housing through to a metal-sheet iso-container housing up to six units. A full battery energy storage solution combined in a container includes the power conversion itself, the batteries, medium voltage transformer and switch-gear and all auxiliary components as well as the energy management system.

What is the storage market like in Ireland?

To date, the storage market in Ireland has been focused on short-duration lithium-ion batteries, that can provide the fast-acting backup needed to support the power system with growing levels of renewables. There are

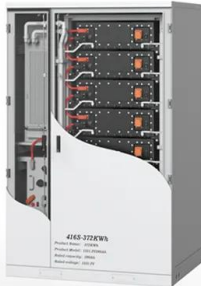

currently 670 MW of primarily short-duration batteries in operation on the island of Ireland.

Can Ireland continue to be a world leader in renewable integration?

Ireland can continue to be a world leader in renewable integration by putting in place investment signals for longer duration energy storage as we increase our wind and solar energy and strive towards our carbon reduction targets.
