

# **Iron Dome Outdoor Power Supply**

## Overview

---

With the United States on track to greatly increase funding for Iron Dome, there have been calls for technology transfer and co-production of Iron Dome in the United States. In fact by August 2011 the (JV) was announced to market a variant of this system. The JV is known as Area Protection Systems. Just as the US and Israel share co-production of the missile system, with manufacturing 40–50 percent of the production content, there was support i.

What is the Iron Dome?

In October 2014, Rafael unveiled a naval version of the Iron Dome called C-Dome. It is designed to protect vessels in blue and littoral waters from ballistic trajectory and direct attack weapons fired in saturation attacks.

How much does Iron Dome cost?

In February 2007, Defense Minister Amir Peretz selected Iron Dome as Israel's defense against this short-range rocket threat. Since then, the \$210 million system has been developed by Rafael Advanced Defense Systems working jointly with the IDF.

How does Iron Dome work?

The system is designed to counter short-range rockets and 155 mm artillery shells with a range of up to 70 kilometers (43 mi). According to its manufacturer, Iron Dome will operate day and night, under adverse weather conditions, and can respond to multiple threats simultaneously. Iron Dome has three central components:.

What is the Iron Dome missile defense system?

The Iron Dome missile defense system was designed to protect Israeli citizens from aerial attacks by launching guided missiles that intercept incoming rockets and other short-range threats in mid-air. Known as “Kippat Barzel” in Hebrew, the system is widely regarded as one of the most important tools in Israel’s arsenal.

Why was Iron Dome a success?

Yoav Fromer of Tel Aviv University argued that the success of Iron Dome provided "both a physical and a psychological solace that enables Israelis to go about their business," which in the long term would reduce the urgency of establishing a broader regional political and diplomatic solution.

Is the Iron Dome a viable anti-aircraft system?

On 27 November 2017, the Israeli military declared initial operational capability for the C-Dome, completing more than 18 months of integration and design work. The Iron Dome has been pitched to the IDF as a more cost-effective anti-aircraft system to intercept unmanned aerial vehicles.
