

# **Is Columbia Energy Storage Cabinet Battery in production**

## Overview

---

What is the Columbia Energy Storage Project?

The Columbia Energy Storage Project will feature Energy Dome's standard-frame 20MW/200MWh CO2 Battery, powering around 18,000 homes in Wisconsin for 10 hours on a single charge. It aims to set a benchmark for other utilities and energy providers seeking to boost their storage solutions and cut carbon emissions.

What makes the energy dome CO2 battery unique?

After a thorough evaluation of technologies available in the market, the Energy Dome's CO2 Battery stood out as a cost-effective, efficient and scalable solution.

When will energy dome's first-of-a-kind CO2 battery plant be completed?

In parallel, the construction of Energy Dome's first-of-a-kind standard CO2 Battery plant in Sardinia, Italy, is also proceeding at full speed. The Sardinia plant's completion is expected by the end of Q1 2025 after reaching full notice-to-proceed at the end of 2023, representing Energy Dome's capability to deliver on a short lead time basis.

Is Alliant Energy a step forward for long-duration energy storage?

This represents a major step forward for long-duration energy storage and underscores both companies' commitment to enhancing renewable energy deployment while maintaining grid reliability and affordability. Left: Claudio Spadacini, CEO - Energy Dome. Right: Raja Sundararajan, Executive Vice President - Alliant Energy.

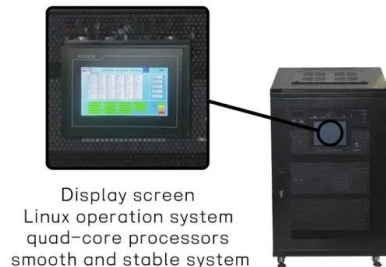

What is a CO2 battery?

The CO2 Battery is already a fully validated and cost-effective system that uses no lithium or rare-earth elements to store electricity, boasting superior round-trip efficiency.
