

Island Charging Station Energy Storage Project

Overview

How many charging stations does Electric Island have?

First announced in December 2020, Electric Island opens with eight vehicle charging stations (a majority of which are available for public use) for the charging of electric cars, buses, box vans and semi-trucks.

What is PGE & DTNA's new EV charging site?

The site is built to immediately provide charging for EVs of all shapes and sizes, and will serve as an innovation center, allowing both PGE and DTNA to study energy management, charger use and performance, and, in the case of DTNA, its own vehicles' charging performance.

Where is DTNA EV charging station?

The station is located across the street from DTNA headquarters (on Swan Island in Portland,) less than one mile from I-5 and it will be open to public for all levels of EV charging. There are eight high-power chargers in total (up to 350 kW, we guess), supplied by various manufacturers. The majority of chargers are available for public use.

How can PGE & DTNA benefit from vehicle chargers?

Use of vehicle chargers featuring power delivery of up to over one megawatt (over 4 times faster than today's fastest light-duty vehicle chargers), enabling PGE and DTNA to develop best practices for cost-effective future deployments;
