

Kazakhstan 2kw wind power generation system

Overview

The first wind generator production plant in the post-Soviet region is set to be constructed in Kazakhstan's Aktobe. This project, with a cost of 84 million euros (US\$95.3 million), is expected to create 500 jobs. Overview There is enormous potential for renewable energy in Kazakhstan, particularly from wind and small hydropower plants. The has the potential to generate 10 times as much power as it currently n.

In 2013, the adopted a new law, On Supporting the Use of Renewable Energy Sources. This promotes technology-specific feed-in tariffs for selected renewable energy technologie.
