

# **Kenya Energy Storage Power Station Settlement Rules**

## Overview

---

Does Kenya need battery energy storage?

A battery energy storage. The question of power storage has become critical as Kenya embraces e-mobility which requires reliable power supplies. The Energy and Petroleum ministry targets to mainstream power storage in its electricity master plan as the country's renewable energy generation expands.

Does Kenya have a geothermal policy?

The Policy also positions Kenya as a leader in geothermal development, capitalizing on its geographical advantage and renewable potential to enhance energy security, spur green industrialization and contribute to global climate goals. Energy efficiency is a key focus of the policy, with an aim to double improvements by 2030.

How does Kenya's electricity sector work?

Kenya's electricity sector previously relied heavily on imported crude oil and petroleum products fueling nearly 40% of the installed power generating capacity. With the commissioning of geothermal, wind and solar power plants, this dependency has decreased in recent years and fossil plants provide less than 10% of the annual electricity generated.

Who oversees energy policy enforcement in Kenya?

Key institutions like the Energy and Petroleum Regulatory Authority (EPRA) and Kenya Electricity Transmission Company (KETRACO) will oversee policy enforcement, and the government will work closely with stakeholders to track progress and adjust strategies as needed to meet the policy's objectives.

How to introduce nuclear power into Kenya's energy mix?

Introduction of nuclear power into Kenya's energy mix requires the development of the necessary framework and infrastructure. This relates to

the safety aspects in development, construction, operation, maintenance, decommissioning, and waste management of the nuclear power program and related amenities.

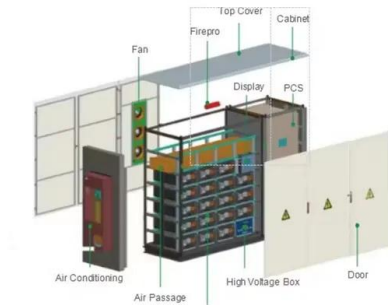

Can a 50MW wind power plant be built in Kenya?

Separately on September 9, 2019, the US Trade and Development Agency awarded a grant to Kenya's Craftskills Energy Limited for a feasibility study by an American firm, Delphos International for the development of a 50MW wind power plant with integrated battery storage capacity in Kenya.
