

Libya s new outdoor power supply market

Overview

How much power will Libya have by 2025?

The power company forecasts that Libya's peak load will increase to 14,834 MW by 2025 and to 21,669 MW by 2030. Combined-cycle power plants in Misrata (650 MW) and Tripoli (671 MW) are contributing to increased generation capacity.

How much electricity does Libya produce a year?

Libya's electricity generation has declined overall since 2013, and output was an estimated 30 terawatt-hours (TWh) of power generation in 2022.⁶² Over a decade of civil war and insufficient maintenance and investment in aging plants and equipment reduced Libya's ability to produce electricity.

Is there a power shortage in Libya?

In August 2022 the General Electricity Company of Libya (GECOL) reported a shortage of 3200 MW in July, with production capacity ranging between 5100 and 5300 MW and demand at 8480 MW.

What happened to the electricity sector in Libya?

f the national electricity sector in Libya". Breaking down the comp or an indeterminate duration. Significant support was provided to support early reform work. The practical transition of the electricity sector is now just starting, and the project played an overall small but not neglig.

How many MW of electricity does Libya generate in 2023?

66 Libya Oil Monitor, "GECOL gives update on power plant maintenance," December 4, 2023; Libya Herald, "Libya generates 8,200 MW of electricity for the first time ever: GECOL," March 20, 2023. 67 France24, "Libya lights up after years of power cuts," September 3, 2023.

Are energy products subsidized in Libya?

Energy products (fuels and electricity) are heavily subsidized in Libya, with subsidies reaching as high as 86% -91% for the various products but are not fully paid by the Government. Petrol and electricity accounted for nearly 70% of Libya's USD 5.4 billion subsidy budget in 2019.
