Overview

What is a liquid cooling energy storage system?

The 100kW/230kWh liquid cooling energy storage system adopts an “All-In-One” design concept, with ultra-high integration that combines energy storage batteries, BMS (Battery Management System), PCS (Power Conversion System), fire protection, air conditioning, energy management, and more into a single unit, making it adaptable to various scenarios.

What is a 100kw/230kwh liquid cooling energy storage system?

The 100kW/230kWh liquid cooling energy storage system was independently designed and developed by EVB. It is widely used in the energy storage field with grid-tied and off-grid inverters. High specific heat liquid cooling technology. Modular “All-In-One” integrated single cabinet design.

What is a liquid-cooled Bess system?

The liquid-cooled BESS—PKENERGY next-generation commercial energy storage system in collaboration with CATL—features an advanced liquid cooling system for heat dissipation.
