

Lithium battery cell capacity

Overview

The capacity of lithium battery cells is measured in amp-hours (Ah) or sometimes milliamp-hours (mAh) where $1 \text{ Ah} = 1,000 \text{ mAh}$. Lithium battery cells can have anywhere from a few mAh to 100 Ah. Occasionally the unit watt-hour (Wh) will be listed on a cell instead of the amp-hour.

Lithium battery cell capacity

[How to Measure and Calculate Lithium ion Battery Capacity?](#)

In this article, you will learn how to measure the capacity of lithium ion batteries, calculate the battery runtime, and understand the key factors that affect capacity.
