

# **Luxembourg lithium-sulfur battery energy storage**

## Overview

---

Will Luxembourg Future Fund 2 invest in Lyten?

Luxembourg Future Fund 2 has made an equity investment in Lyten, a Silicon Valley-based clean tech company. The investment in Lyten, the world leader in Lithium-Sulfur battery technology, will support the development of locally sourced, locally manufactured batteries in Europe for the Electric Vehicle (EV), mobility, space and defense industries.

Where does Lyten manufacture lithium-sulfur batteries?

SAN JOSE, Calif. & LUXEMBOURG-- (BUSINESS WIRE)-- Lyten, the supermaterial applications company and global leader in lithium-sulfur batteries, announced today the acquisition of Northvolt's Dwa ESS operations in Gdansk, Poland, a 25,000 square meter (270,000 sq ft) battery energy storage systems (BESS) manufacturing and R&D facility.

Is Lyten a defining moment for a lithium-sulfur battery?

"This is a defining moment for Lyten," said CEO and co-founder Dan Cook. "Demand for Lyten lithium-sulfur batteries is growing exponentially to meet energy independence, national security, and AI data center needs." This isn't Lyten's first Northvolt pickup. Last November, it acquired Northvolt's Cuberg battery plant in California.

Is lithium sulfur a good battery?

Lithium-Sulfur is also a high energy density, ultra-lightweight battery. "Northvolt's BESS manufacturing operations are truly world class and are a seamless strategic fit for Lyten as we launch an exciting new chapter for our company.

Where does Lyten manufacture battery energy storage systems?

Aerial view of the 25,000-square meter battery energy storage systems manufacturing facility, in Gdansk, Poland, acquired by Lyten from Northvolt.

The facility, previously known as Northvolt Dwa ESS, is Europe's largest energy storage systems manufacturing operation.

Is Lyten lithium-sulfur coming to ISS in 2024?

In 2024, Lyten announced its integration into Chrysler's Halcyon Concept electric vehicle, plans to integrate lithium-sulfur into AEVEX Aerospace's unmanned aerial vehicles, and the selection of Lyten Lithium-Sulfur for demonstration on-orbit aboard the International Space Station (ISS), scheduled for launch later in 2025.
