

Malaysian Polycrystalline Photovoltaic Panel Manufacturer

Overview

Where is solar equipment made in Malaysia?

Malaysia is a major hub for solar equipment manufacturing, with factories of companies like First Solar, Panasonic, TS Solartech, Jinko Solar, JA Solar, SunPower, Q-Cells, and SunEdison in locations like Kulim, Penang, Malacca, Cyberjaya, and Ipoh.

Does Malaysia produce polysilicon?

In addition, Malaysia made a significant contribution to the global supply of polysilicon, a key material for solar cells. In 2021, the country produced 50,000 tonnes of polysilicon, accounting for 6.7% of the worldwide supply, according to the International Energy Agency (IEA).

Is Malaysia a good place to manufacture solar energy?

Solar energy has gained substantial attention worldwide due to its renewable and green nature, and Malaysia is no exception. Malaysia is considered a prime location for solar manufacturing with its favourable climate and government policies.

Where are Panasonic solar panels made?

Located in Kulim, Panasonic manufactures high-efficiency heterojunction solar cells and modules. Known for their quality and durability, Panasonic solar panels offer a high power output and excellent performance even under high temperatures.

Does Malaysia have a global PV market?

Data from the Malaysia External Trade Development Corporation (Matrade) indicate that the nation's exports of PV products totaled RM41.6 billion, representing a 22% increase from the previous year. This indicates an expansion in Malaysia's participation in the global renewable energy sector.

Does Malaysia have a solar market?

This capacity is relatively low vis-à-vis the country's actual solar production and supply potential. However, studies show that Malaysia's solar market is likely to grow fourfold due to increasing investor interest. So, it is safe to say the ease of doing business in Malaysia is beneficial to its solar market.
