

Malta's distributed energy storage industry

Overview

Does Malta have a long-duration energy storage solution?

Malta has developed a long-duration energy storage solution leveraging steam-based heat pump technology that offers a cost- and energy-efficient, flexible, and integration-ready solution to utility and industrial clients.

What is energy in Malta?

Energy in Malta describes energy production, consumption and import in Malta. Malta has no domestic resource of fossil fuels and no gas distribution network, and relies overwhelmingly on imports of fossil fuels and electricity to cover its energy needs.

What is Malta SEMs (steam energy management & storage)?

Malta SEMS (Steam Energy Management and Storage) seamlessly integrates with existing energy infrastructure or operates as a stand-alone system, delivering clean, reliable power and heat at scale. Designed to accelerate decarbonization, SEMS offers grid-scale synchronous long-duration storage with unmatched adaptability.

What makes Malta a good energy solution?

Zero Waste, Circular Solution: Malta's solution uses non-hazardous materials, has no waste by-products, poses no long-term disposal challenges, and is 100% recyclable. Long-Duration, Longer Lifespan: Malta's solution can discharge stored energy in the form of power and/or heat from 8 hours to multiday periods.

How long does a power plant last in Malta?

Long-Duration, Longer Lifespan: Malta's solution can discharge stored energy in the form of power and/or heat from 8 hours to multiday periods. Like other power plants, its lifespan is expected to be 30 years or longer.
