

# **Mexican photovoltaic energy storage lithium battery company**

## Overview

---

Does Mexico have a battery industry?

Mexico's battery industry continues to grow rapidly, with leading manufacturers providing energy storage solutions for a variety of sectors, including automotive, industrial, and renewable energy sectors in Mexico.

Will Mexico be key to the development of lithium batteries?

We believe Mexico will be key to the future of the development of lithium batteries as home to the world's largest single lithium field - "La Ventana" in Sonora. The country likely holds around 17 other deposits, across Baja California Sur, Coahuila, San Luis Potosí, Sonora and Zacatecas, that are largely undeveloped.

Are lithium-ion batteries good for solar energy?

Lithium-ion batteries are well known for keeping our laptops, phones and other devices running, but are little-talked-about when it comes to large-scale energy projects. Bigger storage options are being seen in electric vehicles but battery storage for solar energy operations is still underfunded and underdeveloped.

## Mexican photovoltaic energy storage lithium battery company
