Overview

How much does a BMS cost?

Average active BMS price range: \$500-\$2,000. Hybrid BMS – As the name implies, hybrid BMS combines elements of both passive and active systems. This allows optimized functionality per cell at lower costs than purely active BMS. Hybrid systems actively balance while monitoring voltages, while allowing passive shunting on cell voltage thresholds.

How much does a BMS & PCM cost?

Its BMS & PCM maximize the safety, performance, and longevity of your lithium batteries. Its average price range is \$150-\$5,000. Renesas Electronics – Renesas has engineered award-winning BMS integrated circuits for over a decade and used top auto and tech brands. They offer both passive and active BMS. Average price range: \$150-\$1,200.

What is a passive BMS?

Passive BMS – As the most affordable BMS type, these simpler systems conduct basic monitoring of cell voltages and temperatures. When voltage or temperature thresholds are exceeded, passive BMS cuts off charge or discharge to prevent cell damage. Key functions include overcharge protection, undervoltage protection, and balancing cells.

Why is battery voltage factor important in BMS pricing?

R&D Investment – Cutting-edge BMS capabilities require intensive R&D that market leaders pass along in pricing. The battery voltage factor is an important one for determining BMS costs.
