

Mobile Power Station Power Generation Company

Overview

What is a mobile power station?

The Mobile Power Station is a 12kW portable wind turbine that delivers low-cost, clean energy, when and where you need it. The wind turbine fits in a 20' shipping container, is towable by an ordinary vehicle and sets up in one hour without the need for site improvements or lengthy wind studies.

What is a mobile power generation unit?

Mobile power generation units include dual-fuel capability without water consumption. All solutions are warrantied and include detailed operation and maintenance programs. We can deliver our solutions in weeks and offer important support after installation, including:.

Why should you choose a mobile power solution?

Avoid load shedding, blackouts and brownouts. Our mobile solutions can deliver urgently needed, large-scale power in just weeks. Through our bridge-to-permanent solutions, we can provide the power you need now, with the long-term efficiency and cost savings of permanent technology.

How long does it take to power a mobile power plant?

Our portable, compact, and heavy-duty mobile power plants encompass pre-packaged efficiency, making it possible to ramp up to full power in 15 minutes or less once installed. Mobile power generation units include dual-fuel capability without water consumption. All solutions are warrantied and include detailed operation and maintenance programs.

How does a mobile power station work?

The mobile power station ensures accessible power anywhere it's needed. Equipped with modular wheels, it easily navigates across any terrain, making transportation effortless. Equipped with a real-time display, the MPS informs you precisely what power is being output and input from and to the unit.
