

Mobile energy storage prices

Overview

Typically utilized in devices such as electric vehicles and smartphones, they're now increasingly incorporated into energy storage systems for both residential and industrial purposes. Their market price often lies between \$500 and \$20,000 depending on capacity and brand reputation. How much does the energy storage system cost?

The energy storage system is a 4MW, 32MWh NaS battery consisting of 80 modules, each weighing 3 600 kg. The total cost of the battery system was USD 25 million and included USD 10 million for construction of the building to house the batteries (built by Burns & McDonnell) and the new substation at Alamito Creek.

What is a mobile energy storage system?

Mobile energy storage systems (MESSs) can be self-mobile electric vehicles (vans, buses, or light-duty vehicles) or towable (semi-trailer trucks). During restoration purposes, MESS should be dispatched to the desired location (non-black start generator units locations).

How much does mobile storage cost?

The rental fees for a mobile storage unit range from \$200 to \$600 per month for businesses. The cost for delivery is \$100 to \$500, regardless of the size of the unit. Sometimes, the rate for a personal unit goes up to \$300.

What are base year costs for utility-scale battery energy storage systems?

Base year costs for utility-scale battery energy storage systems (BESSs) are based on a bottom-up cost model using the data and methodology for utility-scale BESS in (Ramasamy et al., 2023). The bottom-up BESS model accounts for major components, including the LIB pack, the inverter, and the balance of system (BOS) needed for the installation.
