

# **Morocco s energy storage battery industry**

## Overview

---

What is Morocco's energy sector?

Morocco's energy sector is, nevertheless, in continuous expansion. With a vast renewable capacity, the country is developing one of Africa's largest clean energy sectors, mainly by exploiting wind, solar, and green hydrogen resources. Discover all statistics and data on Energy sector in Morocco now on [statista.com](https://www.statista.com)!

Why does Morocco import so much energy?

Morocco still imports most of its energy to meet its rising energy consumption, which increased at an average annual rate of 6.5% between 2002 and 2015. Much of that imported energy is generated from fossil fuels.

Is Morocco preparing to launch a 1.6 GW Bess project?

Morocco is preparing to launch a massive foray into clean energy with its ambitious 1.6 GW BESS projects. The National Office for Electricity and Drinking Water (ONEE) is expected to invite tenders for battery energy storage systems (BESS) totaling nearly 1,600MW.

What are Morocco's Bess projects?

Morocco's 1.6 GW BESS projects represent a key step in its clean energy ambitions. The facilities will electrify key urban areas and firm up the grid. Although the initial focus is in the northwest, the government aims nationwide. Furthermore, the projects align with Morocco's ambitions to generate 52% of its electricity from renewables by 2030.
