

Mozambique s new outdoor power supply

Overview

How has Mozambique improved electricity access?

The recently completed Mozambique Energy for All Project, along with the ongoing Sustainable Energy and Broadband Access in Rural Mozambique Project, have significantly contributed to expanding electricity access. To date, these projects have enabled over 2.6 million Mozambicans to connect to the national grid. ASCENT will build on these efforts.

What is Mozambique's energy potential?

The country has one of the largest potentials in Africa, largely thanks to the mighty Zambezi River, which boasts a projected production capacity of 20 GW. More than half of this potential is in Mozambique. Existing power plants such as Hidroeléctrica de Cahora Bassa (HCB) contribute significantly to the country's energy production.

Why is Mozambique a major energy exporter?

Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) – South Africa being the largest importer. The government view energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities.

Does Mozambique have hydropower?

Including hydropower, renewables currently make up 70% of all energy produced in Mozambique. Hydropower has traditionally been the largest contributor to Mozambique's power production. The country has one of the largest potentials in Africa, largely thanks to the mighty Zambezi River, which boasts a projected production capacity of 20 GW.

Can Mozambique achieve universal energy access?

These efforts will significantly advance the Government of Mozambique's goal

of achieving universal energy access," said Luc Lecuit, Interim Division Director for Mozambique, Madagascar, Mauritius, Comoros and Seychelles, and Operations Manager for the World Bank in Mozambique.

How much energy is available in Mozambique in 2023?

"Financial resources for renewables projects have grown steadily, with nearly USD 230 million available in 2023." Including hydropower, renewables currently make up 70% of all energy produced in Mozambique. Hydropower has traditionally been the largest contributor to Mozambique's power production.
