

Myanmar coal-to-electricity energy storage products

Overview

What energy sources are found in Myanmar?

Besides these, wind, solar, geothermal, bioethanol, biodiesel, and biogas are the potential energy sources found in Myanmar. Myanmar's proven energy reserves in 2017 comprised of 94 million barrels of oil, 4.552 trillion cubic feet of gas, and over 500 million metric tons of coal.

How much electricity does Myanmar need?

According to the Ministry of Electricity and Energy, by 2030 hydropower will be able to respond to 38 percent of the total energy demand, domestic natural gas 20 percent, domestic coal four percent and other renewable energy sources nine percent. Therefore, Myanmar still needs 29 percent of total electricity supply for the whole country (See Figure).

Will Myanmar face a shortage of electricity in the future?

Projections show that Myanmar will face a shortage of electricity supply in the future. According to the Ministry of Electricity and Energy, by 2030 hydropower will be able to respond to 38 percent of the total energy demand, domestic natural gas 20 percent, domestic coal four percent and other renewable energy sources nine percent.

What is the energy demand supply situation in Myanmar?

The Myanmar energy demand supply situation indicates that power generation mix must shift to more coal and hydropower, continued use of biomass, natural gas consumption, and appropriate increase of renewable energy such as solar PV and wind power generation.

How can Myanmar save energy?

Future savings in energy could be due to savings in primary energy supply in the residential, commercial, transportation, and industrial sectors. In this regard, Myanmar implemented a range of energy efficiency and conservation

goals and action plans that target energy savings in all sectors.

How does the World Bank provide electricity in Myanmar?

For example, to supply electricity in urban and rural areas, the World Bank provided a loan of up to 400 million USD in 2016 to the Ministry of Electricity and Energy and Ministry of Agriculture, Livestock and Irrigation to implement the Myanmar National Electrification Project which aims to increase the access to electricity .
