

New Energy Energy Storage Cabinet Centralized Power Supply

Overview

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.

Why should we invest in a pumped storage power plant?

By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany. This investment is part of our previously announced strategy to invest in growth and transformation towards a greener business.

Will the energy transition be a success?

The energy transition is a project that can only succeed with the cohesion of society as a whole. Everyone has set a good example and made this business investment possible. Construction work will start immediately and, if all goes well, the Happurg pumped storage plant will be back in operation in 2028. The background

New Energy Energy Storage Cabinet Centralized Power Supply

[Energy storage cabinets for efficient power systems](#)

The Dawn of a New Energy Era In a world that pulses with innovation and an unyielding desire for progress, the way we think about and consume energy is undergoing a profound ...
