

North American New Energy Storage Solution Design

Overview

What new inverters are coming to North America?

The lineup of new products released to the North American market includes the second-generation modular inverter for utility-scale PV projects; the next-generation PowerTitan 3.0, an AC Block BESS for large-scale energy storage applications; and the PowerStack 255CS BESS for commercial and industrial (C&I) energy storage.

Why do we need energy storage solutions?

As the global energy transition accelerates, the need for reliable, scalable and cost-effective energy storage solutions has never been greater.

What does OE's new RD&D report mean for energy storage?

New Report Showcases Innovation to Advance Long Duration Energy Storage (LDES): OE today released its new report “Achieving the Promise of Low Cost LDES.” This report is one example of OE’s pioneering RD&D work to advance the next generation of energy storage technologies.

What does OE's new Noi mean for energy storage technology developers?

OE has announced an NOI for \$8 million in funding for up to four projects to address manufacturability challenges that energy storage technology developers face when making design decisions that impact production of the technology, including scaling.

What new products are coming to the North American market?

New products launched for the North American market include modular utility-scale PV inverter, 6.9 MWh BESS in a 20-foot container, and cutting-edge technology extending to C&I uses.

North American New Energy Storage Solution Design

Autel Energy Completes First U.S. EV Charging + Battery Storage ...

3 days ago· Officially permitted and approved by Duke Energy, this installation marks a major milestone in Autel Energy North America's portfolio and demonstrates the company's ability to ...
