

Outdoor energy storage applications in Brazil

Overview

China's Risen Energy is deploying containerized BESS units across Brazil's northeast—enough to power 70,000 homes during blackouts [2]. Local startups are aggregating rooftop solar + storage into Brazil's first VPP network, with 200MW planned by Q3 2026. Can foreigners invest in battery storage businesses in Brazil?

Investment, incentives and taxation scenarios According to Brazilian law, there are no legal restrictions on direct foreign investment in the battery storage businesses or in the power sector (except in very specific segments or sectors of the economy).

Could pumped hydro be the missing piece in Brazil's energy system?

Conclusion Although energy storage solutions have yet to be widely deployed in Brazil, generation flexibility remains a scarce commodity. Therefore, storage projects, including pumped hydro, could be the missing piece needed to enhance the country's energy system.

Are battery energy storage systems at a premium in the future?

Flexible generation and correlated solutions, including battery energy storage systems (BESS), are therefore likely to be at a premium in the future.

What businesses are deploying Bess in Brazil?

A few other businesses exist in Brazil as well, such as Micropower, Aldo Solar and YouOn, for instance. The deployment of BESS can take various forms, and business initiatives may vary. To address this, the National Electric Energy Agency of Brazil (ANEEL) has identified a regulatory gap and initiated a three-phase roadmap.
