

Panama Hybrid Power Plant

 **TAX FREE**    

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

Overview

Where will a new energy plant be built in Panama?

The plant, owned and operated by Consortium Group Energy Gas Panama which includes private companies InterEnergy Group and AES Panama, will be built in Telfers Island, near the port of Colón, next to the Panama Canal.

What is a hybrid power plant?

Improving battery technology and the growth of variable renewable generation are driving a surge of interest in “hybrid” power plants that combine, for example, wind or solar generating capacity with co-located batteries.

Why do we need a gas turbine in Panama?

The use of renewable energy sources is continuously being expanded in Panama, but the grid infrastructure still requires highly efficient and flexible gas turbine technology to support the variable nature of renewables and help us improve the reliability and stability of the country’s electrical system.

Why did the Panamanian government cancel the GTPP power project?

In April 2024, the Panamanian government denied a request from Sinolam Smarter Energy to extend its permit for the GTPP power project through December 2025, and officially cancelled the license previously granted, effectively shelving the project.

How many types of hybrid plants are there?

But there are nearly twenty other hybrid plant configurations as well, including several different fossil hybrid categories (each dominated by the fossil component) as well as wind+storage, wind+PV, wind+PV+storage, geothermal+PV, and others.
