

# Panama new energy storage grid-connected equipment manufacturer

#### **Overview**

Can a liquid cooling battery energy storage system improve energy reliability in Panama?

On October 18, 2024, a 372kWh liquid cooling battery energy storage system (BESS) was successfully installed in Panama. GSL Energy, a China-based manufacturer specializing in energy storage solutions, purchased the system. This project aims to enhance energy reliability and efficiency in Panama's energy grid.

Where will a new energy plant be built in Panama?

The plant, owned and operated by Consortium Group Energy Gas Panama which includes private companies InterEnergy Group and AES Panama, will be built in Telfers Island, near the port of Colón, next to the Panama Canal.

What is the Panama 372kwh outdoor liquid cooling battery energy storage system?

The Panama 372kWh Outdoor Liquid Cooling battery energy storage system (BESS) project demonstrates the successful deployment of cutting-edge energy storage technology in a challenging environment. This installation serves as a model for future projects aiming to enhance energy resilience and sustainability in the region.

Why do we need a gas turbine in Panama?

The use of renewable energy sources is continuously being expanded in Panama, but the grid infrastructure still requires highly efficient and flexible gas turbine technology to support the variable nature of renewables and help us improve the reliability and stability of the country's electrical system.

Can GE turn Panama into a regional energy hub?

The use of the LNG regasification infrastructure will be a key aspect to turn Panama into a regional energy hub. GE established its first office in the

Central America region in Honduras, in 1906. It has since expanded throughout Central America and the Caribbean and participated in large-scale projects, such as the Panama Canal.

Will Panama become a regional energy hub?

This terminal was the first to provide LNG in the country and has provided natural gas to support the growth of the power, industrial and the transportation sector in the country. The use of the LNG regasification infrastructure will be a key aspect to turn Panama into a regional energy hub.
