

Philippines lithium iron phosphate battery energy storage container

Overview

Where is the Philippines' first lithium iron phosphate battery factory located?

Philippines President Ferdinand 'Bong Bong' Marcos Jr has attended the inauguration of the country's first lithium iron phosphate (LFP) battery factory. The event was held today at StB Giga Factory in the Clark Special Economic Zone in Tarlac, a province about 130km from the national capital Manila.

Why should the Philippines invest in LiFePO₄ batteries?

The factory's focus on LiFePO₄ batteries, known for their safety and longevity, positions the Philippines as a key player in Southeast Asia's clean energy storage market. It is expected to play a pivotal role in meeting the country's renewable energy goals and the development of a local EV industry.

Where are EV batteries made in the Philippines?

"As the first manufacturing plant in the Philippines for advanced iron phosphate batteries. (it) sets the stage for the Philippines to become a player in clean energy storage in our part of the world," he added. The new EV battery plant is located in New Clark City.

Who makes lithium-iron-phosphate (LFP) batteries?

The new facility is owned by an Australian company and produces lithium-iron-phosphate (LFP) batteries. The battery factory is expected to have an annual production capacity of 2 GWh by 2030, enough to power 18,000 EVs or about half a million home battery systems.

Where is pH's first LFP battery factory?

PH's First LFP Battery Factory Officially Opens. President Ferdinand R. Marcos Jr. (center) leads the ribbon-cutting ceremony of StB Giga Factory in New Clark City, Tarlac.

How will a new LiFePO₄ factory benefit the Philippines?

In summary, the new factory's local production capacity, export focus, and ability to scale up output will likely contribute to lower costs for LiFePO₄ batteries in the Philippines, benefiting industries like renewable energy and electric vehicles, and ultimately making these technologies more accessible to consumers
