

# **Photovoltaic battery cabinet supply chain**

## Overview

---

What is the solar photovoltaics supply chain review?

The Solar Photovoltaics Supply Chain Review, produced by the DOE Solar Energy Technologies Office with support from the National Renewable Energy Laboratory, will help the federal government to build more secure and diverse U.S. energy supply chains.

Can America reestablish a robust solar manufacturing supply chain?

The assessment concludes that, with significant financial support and incentives from the U.S. government as well as strategic actions focused on workforce, manufacturing, human rights, and trade, America could reestablish a robust domestic solar manufacturing supply chain and become a competitive leader in a global solar industry.

Which country produces the most cost-competitive solar PV supply chain?

China is the most cost-competitive location to manufacture all components of the solar PV supply chain. Costs in China are 10% lower than in India, 20% lower than in the United States, and 35% lower than in Europe. Large variations in energy, labour, investment and overhead costs explain these differences.

What is the supply chain for c-Si PV?

The supply chain for c-Si PV starts with the refining of high-purity polysilicon. Polysilicon is melted to grow monocrystalline silicon ingots, which are sliced into thin silicon wafers.

Are lithium-ion batteries still a dominant technology?

Lithium-ion batteries remain the dominant technology, and supply chain constraints are putting immense pressure on the industry. Currently, there is a limited number of lithium-ion battery manufacturing facilities in the U.S., according to a recently released report from the American Clean Power

Association (ACP).

Are lithium-ion batteries a challenge to capacity & growth?

However, the limited number of lithium-ion battery suppliers remains a significant challenge to capacity and growth. “As demand for domestic content increases, so too will the lead times and costs associated with these products,” states TruGrid Senior Vice President of Supply Chain Tom Gallagher.
