

# **Photovoltaic cell module exports**

## Overview

---

Is India a net importer or exporter of photovoltaic (PV) products?

India is making significant progress in transitioning from a net importer to a net exporter of photovoltaic (PV) products. In Fiscal Year (FY) 2024, Indian PV manufacturers exported approximately US\$2 billion worth of PV modules. The export value of PV modules from India increased by more than 23 times in just two years between FY2022 and FY2024.

Does India export photovoltaic modules?

The export of Indian photovoltaic (PV) modules has risen exponentially by more than 23 times between Fiscal Year (FY) 2022 and FY2024, primarily to the US, which accounted for more than 97% of India's exports in both FY2023 and FY2024.

Which countries import PV modules?

The total for all types of PV modules is provided. Table 7. Information in Table 7 covering imports has been consolidated into four categories: China, Singapore, Taiwan & Vietnam; Malaysia; South Korea, Thailand, and United Arab Emirates; and All Others and Unknown. All Others and Unknown includes data from annual and monthly respondents.

Can data be published for different types of PV cells & modules?

Data can no longer be published for the specific types of PV cells and modules, or by region. Table changes: Table 1. Not published for 2022. Table 2. Unchanged, includes data from annual and monthly respondents. Table 3. Unchanged, includes data from annual and monthly respondents. Table 4.

What data is included in the photovoltaic industry report?

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories. Summary data include

volumes in peak kilowatts and average prices.

How many units are in a photovoltaic cell?

CN: Export: Quantity: Photovoltaic cells: Not assembled in modules or Made up into panels data is updated monthly, averaging 432,303.113 Unit th from Jan 2022 (Median) to Feb 2025, with 38 observations. The data reached an all-time high of 915,033.768 Unit th in Jan 2025 and a record low of 192,577.121 Unit th in Jan 2022.
