

Photovoltaic inverters for the Angolan market

Overview

What is the solar potential for electricity production in Angola?

This page presents the solar potential for electricity production in Angola and the solar projects identified throughout the territory: Angola has a solar potential of 17,3 GW, distributed for over 368 projects, of which 120, or 3,436 MW, present conditions for grid connection by 2017.

What are the different types of solar projects in Angola?

In Angola, the solar resource offers numerous possibilities for projects development , whether for grid connection, either for off grid electrification projects. In this sense, the projects were classified into 4 types: • Type IV: Consumption points not electrified until 2017.

How many solar projects are eligible for grid connection in Angola?

Among these, 3,436 MW (120 projects) are eligible for grid connection in the short term until 2017. Among the provinces of Angola, Luanda, Cuanza Norte and Cuanza Sul are the ones with the highest viability for projects due to the strong capacity of the grid to absorb intermittent power.
