

Photovoltaic power generation with energy storage in Kazakhstan

Overview

Is solar energy a viable energy source in Kazakhstan?

In 2019, another solar power plant in Kazakhstan, Saran, with a capacity of 100 MW started its operation in the Karaganda region (Satubaldina, 2020). According to the International Energy Agency (IEA), within the period of 40 years, solar energy has a potential to meet about 20-25% of the energy demand of the country.

Is Kazakhstan a good place to install solar power plants?

At least 50% of the territory of Kazakhstan is suitable for installing solar power plants (Antonov, 2014). However, up until recently, solar resources of the country were not being used for power generation. Kazakhstan is developing solar energy technologies, namely production of photovoltaic modules using local silicon.

What was the installed solar power capacity in Kazakhstan in 2018?

As of 2018, the solar power generation was 0.1 TWh and the installed capacity was 209 MW. Solar power generation in renewables energy is expected to meet the highest electricity demand on Kazakhstan's power grid.

Will solar power meet the highest electricity demand in Kazakhstan?

Solar power generation in renewables energy is expected to meet the highest electricity demand on Kazakhstan's power grid. As of 2018, the solar power generation was 0.1 TWh and the installed capacity was 209 MW. Indian solar PV EPC Company Sterling and Wilson expects to have 200 MW of capacity in Kazakh solar market by end of 2020.

Can solar power drive Kazakhstan's decarbonisation?

The focus now is on leveraging solar's comparative advantages to drive forward Kazakhstan's decarbonisation and harness its significant solar resources. This report builds on the first edition of solar investment

opportunities in Kazakhstan.

Can Kazakhstan produce solar cells using silicon?

As Kazakhstan is rich in silicon (85 million tons), production of silicon solar batteries on the domestic market was started (Sim, 2015). In this light, recently “Astana Solar” plant aimed at the production of photovoltaic modules was launched in Nur-Sultan. The plant is to produce solar cells using Kazakhstan’s silicon.
