

Portable Power Bank on Wheels

Overview

Plus, portable charging increases flexibility and convenience to help people make the switch to EVs. A user charges it at home or in the office, then wheels it to their car like a small suitcase. They can charge their EV anywhere they are from any parking spot! .

Richie Sibal and Jonathan Carrier developed the handy portable electric vehicle (EV) charger Go and founded the company ZipCharge to bring its charging product to the market. Go is perfect for people who want an EV but have range anxiety and those.

Now, we want to take it a step further. What if you have an EV and never have to worry about having enough of a charge to go anywhere you like?

We can accomplish that with dynamic wireless charging. Researchers and companies are developing wireless.

Another company called SparkCharge has also developed a portable EV charging system called the Roadie, but it isn't as compact and easy to handle as the Go. Instead, the Roadie.

If you could charge wirelessly at home, at work, and along the way – plus portably when you can't – you'd never have to think about charging your.
