Do solar panels need an inverter?

Yes, an inverter is necessary for any solar panel system. Solar panels produce DC electricity, but most appliances and the grid operate on AC power. Inverters make this conversion, allowing your home or business to safely use the solar energy generated. How long is the warranty?

.

What does a solar inverter do?

A solar inverter converts the direct current (DC) electricity generated by your solar panels into alternating current (AC), which can be used by household appliances and fed into the grid. It's an essential component of any solar system, ensuring the energy produced is usable in your home or business. Do I need an Inverter for my solar panel?

.

What is a hybrid inverter?

A hybrid inverter can manage energy from multiple sources, such as solar panels, batteries, and the grid, allowing you to store excess energy for later use. Standard inverters, however, only convert solar power for immediate use and do not support battery storage.

Why should you invest in a bespoke photovoltaic system?

Invest in your future with our bespoke photovoltaic systems in the sun-kissed Algarve region! Boasting an average of 3,000 hours of sunshine per year, this area offers the perfect environment for maximum energy generation. Benefit from clean, sustainable energy while saving money.

What types of inverters are available?

Our range includes single-phase and three-phase hybrid inverters, suitable for residential, commercial, and even industrial applications, providing scalable and reliable energy management. What kind of maintenance does an Inverter need?
