

# Portugal s rooftop solar power system

## Overview

---

In addition to tenders for large scale power plants, Portugal has set a framework for the installation of small scale rooftop solar installations which came into force in January 2020.

Does Portugal have a solar potential?

While Portugal's revised National Energy and Climate Plan (NECP) and Long-Term Strategy for Carbon Neutrality (LTS) have raised targets for decentralised solar photovoltaic (PV) capacity, they remain below the country's solar potential.

Why is Portugal a leader in solar energy adoption?

Portugal has emerged as a global leader in solar energy adoption, thanks to its favorable climate, ambitious renewable energy targets, and robust policy frameworks. This page provides detailed insights into the solar landscape of Portugal, offering valuable information for professionals and enthusiasts in the renewable energy sector.

Why do solar panels shut off in Portugal?

The majority of solar panel systems in Portugal automatically shut off in the event of a power outage for safety. This happens so electricity is not fed back into the grid, potentially harming technicians working on the lines. However, there are solutions such as SmartGuard by Huawei, to keep your system running during the power outage.

Is Portugal a good country to install solar panels?

Portugal enjoys over 300 sunny days annually, making it one of the most solar-rich countries in Europe. According to data from the International Energy Agency (IEA), the country's annual solar irradiation ranges between 1,600 and 2,200 kWh/m<sup>2</sup>, making it ideal for photovoltaic (PV) installations.

Why should you invest in solar energy in Portugal?

Portugal's solar energy sector is a beacon for renewable energy development,

offering abundant opportunities for professionals and investors. The combination of high solar potential, supportive policies, and technological advancements positions the country as a leader in the global solar market.

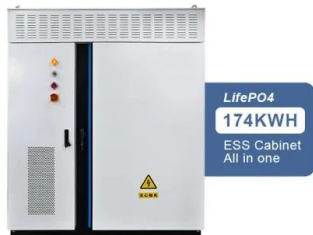

What is the largest solar power plant in Portugal?

On 9 October 2021, the largest solar power plant in Portugal was inaugurated in Alcoutim. With an installed capacity of 219 MW, the power plant has 661,500 solar panels and can power the needs of 200,000 homes. It occupies an area of 320 hectares and will prevent the emission of 326,000 tons of carbon dioxide every year.
